Local de aplicação de torneiras de encastrar - Recessed tap application location

Nota: Aconselhamos sempre a aplicação do conjunto anti-gotas nas torneiras de encastrar, para evitar, a tão indesejável entrada de água pelo orifício do suporte de chuveiro que se deposita na zona inferior da banheira. Este dispositivo permite drenar a água durante e depois do banho através do tubo flexível que liga o anti-gotas à válvula de descarga automática.
Note: We always recommend the application of the anti-drip set on the built-in taps, to prevent undesirable water entry through the hole in the shower support that is deposited in the lower area of the bathtub. This device makes it possible to drain the water during and after bathing through the flexible tube that connects the anti-drip valve to the automatic drain valve.

Nota: Aconselhamos sempre a aplicação do conjunto anti-gotas nas torneiras de encastrar, para evitar, a tão indesejável entrada de água pelo orifício do suporte de chuveiro que se deposita na zona inferior da banheira. Este dispositivo permite drenar a água durante e depois do banho através do tubo flexível que liga o anti-gotas à válvula de descarga automática.

Note: We always recommend the application of the anti-drip set on the built-in taps, to prevent the so undesirable entry of water through the hole in the shower support that is deposited in the lower area of the bathtub. This device makes it possible to drain the water during and after bathing through the flexible tube that connects the anti-drip valve to the automatic drain valve.
