

A close-up photograph of three thick, green plant stems, possibly from a succulent or a similar plant, arranged diagonally from the bottom left towards the top right. The stems are smooth with a slight texture and are set against a plain, light beige background. The lighting is soft, highlighting the natural color and form of the plant material.

SOSTENIBILITÀ IN ABK GROUP

Sustainability in ABK Group

Per ABK GROUP, la sostenibilità non è un ideale astratto, ma una sfida ampia e complessa che richiede un impegno costante. La transizione verso un modello di sviluppo responsabile è un obiettivo che richiede un'evoluzione delle proprie procedure, tecnologie e processi gestionali. Un percorso fatto di azioni concrete che trova forma compiuta nel nostro bilancio di Sostenibilità.

AZIONI PRINCIPALI Main Actions

Ecobody

Dal 2014, ABK GROUP ha introdotto gli impasti ECO-BODY, formulati con almeno il 40% di materie prime di alta qualità recuperate da lavorazioni interne ed esterne. Questa soluzione, certificata da Bureau Veritas, consente ai prodotti di contribuire al calcolo dei crediti LEED, integrando il design sostenibile degli edifici in una logica di economia circolare. Consulta l'Elenco degli articoli Eco-Body nell'area download di abk.it

COGENERATORE Cogenerator

Negli ultimi sei anni ABK GROUP ha destinato oltre 40 milioni di euro a nuovi impianti produttivi ad alta efficienza, tecnologie avanzate per il recupero energetico e soluzioni per la gestione responsabile delle risorse. Tra questi, l'impianto di cogenerazione attivo dal 2019 nello stabilimento di Solignano consente di produrre il 96% dell'energia elettrica consumata in sito, grazie a un sistema che recupera il calore residuo e lo reintegra nel ciclo industriale, riducendo sensibilmente i consumi e le emissioni.

RIDUZIONE DEI FUMI Reducing flue gas emissions

ABK GROUP ha adottato un sistema che convoglia i fumi all'interno dell'atomizzatore a oltre 600°C, eliminando le sostanze organiche volatili direttamente in linea, con risultati incoraggianti certificati da monitoraggi trimestrali. Si tratta di una soluzione alternativa ai post-combustori, frutto di due anni di ricerca su materiali e componenti a basso impatto, che ha portato alla sostituzione in fase di decorazione digitale delle colle a base solvente con analoghi prodotti a base acqua.

For ABK Group, sustainability is not an abstract ideal but a broad and complex challenge that requires unflagging commitment.

The transition to a responsible development model calls for changes in procedures, technologies and management processes. It is a journey made up of concrete actions set out in our Sustainability Report.

In 2014, ABK GROUP introduced ECO-BODY formulations containing at least 40% high-quality raw materials recovered from internal and external processes. Certified by Bureau Veritas, this solution allows products to contribute to LEED credit calculations, integrating sustainable building design into a circular economy approach. The list of Eco-Body items can be found in the download area of abk.it.

Over the last six years, ABK GROUP has invested more than €40 million in highly efficient new production facilities, advanced energy-recovery technologies and solutions for responsible resource management.

One of these is the cogeneration plant operating at the Solignano factory since 2019, which produces 96% of the electricity consumed on site. By recovering residual heat and feeding it back into the industrial cycle, the system significantly reduces energy consumption and emissions.

ABK GROUP has adopted a system that channels flue gases into the spray dryer at over 600°C, eliminating volatile organic compounds directly on the line. The system has shown encouraging results, as certified by quarterly monitoring. This alternative to post-combustion systems is the result of two years of research into low-impact materials and components, leading to the replacement of solvent-based glues with water-based products in the digital decoration phase.

Tecnologie Esclusive Exclusive Technologies

La tecnologia PTECH migliora la resistenza allo scivolamento, pur mantenendo una piacevole sensazione al tatto. PTECH è il risultato di un innovativo processo produttivo che coniuga la selezione delle materie prime con le fasi di pressatura, cottura e lavorazione a fine linea. I prodotti PTECH, pur raggiungendo i più elevati coefficienti di attrito, si puliscono facilmente, per questo possono essere utilizzati nei progetti wellness, in aree pubbliche o commerciali.

The unique PTECH technology improves slip resistance while maintaining a pleasant tactile sensation. PTECH is the result of an innovative production process that combines a meticulous selection of raw materials with the pressing, firing and end-of-line processing stages. Despite their high coefficient of friction, PTECH products are easy to clean, making them ideal not only for use on indoor floors but also in wellness spaces, in public or commercial areas.

Tecnologie Esclusive Exclusive Technologies

La tecnologia PTECH migliora la resistenza allo scivolamento, pur mantenendo una piacevole sensazione al tatto. PTECH è il risultato di un innovativo processo produttivo che coniuga la selezione delle materie prime con le fasi di pressatura, cottura e lavorazione a fine linea. I prodotti PTECH, pur raggiungendo i più elevati coefficienti di attrito, si puliscono facilmente, per questo possono essere utilizzati nei progetti wellness, in aree pubbliche o commerciali.

NORDIK STONE ASH, GREY e SAND in finitura PTECH, nei formati 120x120, 60x120 e 60x60, può essere fornita su richiesta con un ordine soggetto a lotto minimo di produzione.

The unique PTECH technology improves slip resistance while maintaining a pleasant tactile sensation. PTECH is the result of an innovative production process that combines a meticulous selection of raw materials with the pressing, firing and end-of-line processing stages. Despite their high coefficient of friction, PTECH products are easy to clean, making them ideal not only for use on indoor floors but also in wellness spaces, in public or commercial areas.

NORDIK STONE ASH, GREY and SAND in PTECH finish, in the 120x120, 60x120 and 60x60 sizes, can be supplied on request with an order subject to a minimum production batch.

SUPREME è un progetto ceramico ispirato al mondo del marmo composto da quattro diverse collezioni, ciascuna caratterizzata da differenti tipologie e tonalità di colore, che grazie alla versatilità estetica, ai molteplici formati e alle differenti finiture rendono questa proposta estremamente completa per la progettazione d'interni. Oltre alle finiture Naturale e Lux, SUPREME propone le superfici Antique 3D, dal fascino heritage ma straordinariamente attuale, che richiamano i pavimenti degli edifici storici consumati dal calpestio. Le versioni Lux 3D e Soft 3D sono invece caratterizzate da venature in bassorilievo, che arricchiscono rispettivamente l'effetto levigato o quello satinato. A completamento della gamma le finiture PTECH, che migliorano le performance di resistenza allo scivolamento sul bagnato, oltre ad una selezione di articoli R11 in 20 mm, specifici per l'utilizzo in outdoor.

SUPREME is a collection of marble-inspired surfaces composed of four individual lines, each with its own unique varieties and colour tones. With its aesthetic versatility, wide choice of sizes and different finishes, it is an extremely comprehensive solution for interior design applications. Alongside the Naturale and Lux finishes, SUPREME includes Antique 3D surfaces with a heritage feel yet a distinctly contemporary look, reminiscent of the timeworn floors of historic buildings. The Lux 3D and Soft 3D versions feature bas-relief veins that enhance the polished and satin effects of the respective surfaces. The range is completed by PTECH finishes, which improve slip resistance on wet surfaces, and a selection of 20 mm thick R11 tiles designed specifically for outdoor use.

Tecnologie Esclusive Exclusive Technologies

La tecnologia PTECH migliora la resistenza allo scivolamento, pur mantenendo una piacevole sensazione al tatto. PTECH è il risultato di un innovativo processo produttivo che coniuga la selezione delle materie prime con le fasi di pressatura, cottura e lavorazione a fine linea. I prodotti PTECH, pur raggiungendo i più elevati coefficienti di attrito, si puliscono facilmente, per questo possono essere utilizzati nei progetti wellness, in aree pubbliche o commerciali.

The unique PTECH technology improves slip resistance while maintaining a pleasant tactile sensation. PTECH is the result of an innovative production process that combines a meticulous selection of raw materials with the pressing, firing and end-of-line processing stages. Despite their high coefficient of friction, PTECH products are easy to clean, making them ideal not only for use on indoor floors but also in wellness spaces, in public or commercial areas.

TECHNICAL INFO

Tecnologie Esclusive Exclusive Technologies

La tecnologia PTECH migliora la resistenza allo scivolamento, pur mantenendo una piacevole sensazione al tatto. PTECH è il risultato di un innovativo processo produttivo che coniuga la selezione delle materie prime con le fasi di pressatura, cottura e lavorazione a fine linea. I prodotti PTECH, pur raggiungendo i più elevati coefficienti di attrito, si puliscono facilmente, per questo possono essere utilizzati nei progetti wellness, in aree pubbliche o commerciali.

SUPREME EVO PURE STATUARIO, CALACATTA EXTRA in finitura PTECH, nei formati 120x120 e 60x120, può essere fornita su richiesta con un ordine soggetto a lotto minimo di produzione.

The unique PTECH technology improves slip resistance while maintaining a pleasant tactile sensation. PTECH is the result of an innovative production process that combines a meticulous selection of raw materials with the pressing, firing and end-of-line processing stages. Despite their high coefficient of friction, PTECH products are easy to clean, making them ideal not only for use on indoor floors but also in wellness spaces, in public or commercial areas.

PURE STATUARIO, CALACATTA EXTRA in PTECH finish, in the 120x120 and 60x120 sizes, can be supplied on request with an order subject to a minimum production batch.

Tecnologie Esclusive Exclusive Technologies

La tecnologia PTECH migliora la resistenza allo scivolamento, pur mantenendo una piacevole sensazione al tatto. PTECH è il risultato di un innovativo processo produttivo che coniuga la selezione delle materie prime con le fasi di pressatura, cottura e lavorazione a fine linea. I prodotti PTECH, pur raggiungendo i più elevati coefficienti di attrito, si puliscono facilmente, per questo possono essere utilizzati nei progetti wellness, in aree pubbliche o commerciali.

HYPER in finitura PTECH, nei formati 120x120, 60x120 e 60x60, può essere fornita su richiesta con un ordine soggetto a lotto minimo di produzione.

The unique PTECH technology improves slip resistance while maintaining a pleasant tactile sensation. PTECH is the result of an innovative production process that combines a meticulous selection of raw materials with the pressing, firing and end-of-line processing stages. Despite their high coefficient of friction, PTECH products are easy to clean, making them ideal not only for use on indoor floors but also in wellness spaces, in public or commercial areas.

HYPER in PTECH finish, in the 120x120, 60x120 and 60x60 sizes, can be supplied on request with an order subject to a minimum production batch.

Imballi packaging

Nuovi sistemi di imballo

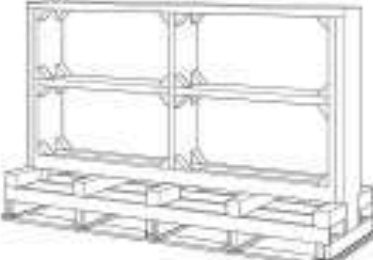

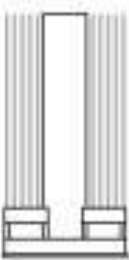

Innovazione del progetto lastre si esprime anche attraverso la parte logistica del progetto. ABK Group rivoluziona il sistema di imballaggio delle lastre ed è a oggi l'unica azienda che ha portato il sistema a cavalletto impilabile alla dimensione di cm 75x284x1475 (lastre 120x280) 75x168x109 (lastre 80x160) e 75x26x200 (lastre 26x200). Questi i principali vantaggi offerti:

- essendo impilabile permette di ottimizzare gli spazi all'interno dei magazzini.*
- la profondità di 75 cm consente di sfruttare a pieno il volume di carico del container (3 pallets ne occupano perfettamente la larghezza).
- il posizionamento verticale del prodotto garantisce una maggiore protezione delle lastre durante le fasi di trasporto.
- facilita le operazioni sul cantiere in quanto le lastre si trovano già posizionate in verticale, il materiale è facilmente ispezionabile e removibile per l'installazione.
- le dimensioni complessive del cavalletto consentono maggiori spazi di manovra all'interno dei locali di posa rispetto alle casse tradizionali e agevolano il sollevamento del materiale mediante mezzi meccanici (gru-montacarichi).

È caratterizzato da un sistema di regatura che consente di liberare anche 1 solo collo alla volta, senza compromettere la stabilità del materiale che rimane sul pallet, evitando così il rischio di rottura. Le lastre dovranno essere liberate rispettando la sequenza opposta rispetto a quella con cui sono state confezionate, quindi iniziando dall'ultimo collo regettato.

New packaging systems

Innovation in the slab's range is also reflected in the project's logistics. ABK Group has revolutionised the packaging of ceramic slabs and is the only company to have expanded the stacking rack pallet system to the 75x284x1475 (slabs 120x280) 75x168x109 (80x160 slabs) and 75x26x200 (slabs 26x200) cm size. This has the following advantages:

- stacking optimises the use of space in warehouses.*
- the 75 cm depth enables full use of container load space (3 pallets fit perfectly side by side). The vertical positioning of the product better protects the slabs during shipping.
- it facilitates work on site, since the slabs are already positioned vertically, making the material easy to inspect and remove for installation.
- the overall size of the rack pallet provides greater space for manoeuvring in the installation area in comparison with conventional crates, and also makes it easier to lift the slabs mechanically (with a crane or lift).
- the rack pallet system employs strapping which allows the user to remove a single package at a time without affecting the stability of the other packages on the pallet, thus minimising the risk of breakage. The slabs must be released from the packaging by reversing the packaging sequence, i.e. starting with the last package to have been strapped on.
